The foundation model for property forecasting

**homecastr.com**

Everyone knows what a home is worth today

Nobody can affordably show you where it's going.

WHAT EXISTS
Today's estimate

$425K

How it works

Public Data

Sales, permits, census, zoning

→

Diffusion Model

Foundation model trained on 1M+ lots

→

Forecast Bands

Probabilistic ranges per property, per year
Public data in. Probabilistic ranges out.

Why now

300bps Swing

Rate Volatility

Rate swings repriced every market.
Static models can't keep up.

Buyers need scenario forecasts.

Diffusion Models

Now Feasible at Scale

GPU costs dropped 10x.
Training on 1M+ parcels

is now practical.

The demand exists. The technology just caught up.
